FASHIONISTA

She adores fashion and all it's minutae, likes to be the height of hipness and to make an entrance wherever she goes. Always on trend and in tune with the latest looks, she strives to appear distinctive and original each day. That's the crazy, fashion-centred world of FASHIONISTA.

Each of the three standing positions (standing, stepping and striding), is available with three interchangeable arm options and realistic head or sculpted cropped hair. To accompany, there is a neat cross-legged sitter, which makes strong groups of tightly clustered figures possible in limited spaces. This multi-faceted collection is therefore capable of reflecting a wide range of personalities and fashion directions.

Featuring a beautifully versatile face, FASHIONISTA has been sculpted to give maximum flexibility across a broad range of flesh tones and make-up styles, allowing for immense breadth of expression and adaptability when styling.

A full range of three quarter bodies based on the original FASHIONISTA figure have been designed to complement the main figures. These versatile pieces can be mounted on the striking etched acrylic butterfly base or alternative bases from Proportion's main collection.

Able to fit convincingly into any fashionable surrounding, FASHIONISTA is a girl who is always on first name terms with style and originality. Few could pass her on the street without looking back. That's just the way she planned it!
